Selecting Eggs for Show

1. Select a clean cardboard carton with little or no writing.

2. Select 2 to 3 hens to gather from.

3. Start to gather eggs 1 to 2 weeks before the show, 2 to 3 dozens of eggs work well.

4. Clean and dry the eggs. Place eggs point down in the carton.

5. Look for uniformity in color and size. The more uniformed your dozen is, the better.

6. Remove any malformed & misshapen eggs (the judge will be looking for these).

7. Know what kind of hen laid your eggs and how long it took to gather all you needed for the perfect dozen. Know what you fed your hens, including the percent of protein.

8. A notebook in required.

9. Each fair entry will be judged on the consistency of color, shape, and size of the eggs, and the quality and effectiveness of the notebook presentation.
