Intermediate Level
4-H Market Sheep Project Record

To be completed by 4-H sheep project members 12-14 years old by January 1.

Name ___________________________________________ Address ___________________________________________

Club Name ________________________________________ Project Leader ____________________________________

Birth Date ___/___/____ Member's age as of January 1 of the current project year ________________

Year in 4-H ___________ Year in sheep project ___________

Date Record Started ____________________ Date Record Ended ____________________

This record is a part of your 4-H Market Sheep Project work. By keeping your records up-to-date you will be able to see how much progress you make as you set goals and work to accomplish them. Write neatly and clearly. If you need help, ask your parents and leaders to work with you.

Why keep records?

Keeping records on your project can be interesting and fun – not dull or boring. Good records will:

✦ help you learn about animals, their rate of growth, the feed they require, the cost of the feed, and their habits.
✦ help you plan future projects.
✦ let you know if you made or lost money and how much.
✦ improve your management practices.
✦ give you a record of your project activities.

Keep this record as part of your Member's Personal 4-H Record book, which provides space for a complete record of your 4-H projects and activities. This information is helpful if you ever apply for 4-H awards or a 4-H scholarship.

Remember – records are no better than what you put into them!

I. Important Information about My Market Sheep Project:

A. I enrolled in this project because I want to learn ____________________________________________________

_________________________________________________________________________________________

_________________________________________________________________________________________

_________________________________________________________________________________________

B. This is how I obtained my project animal(s): ____________________________________________________

_________________________________________________________________________________________

_________________________________________________________________________________________
II. My 4-H Project Pictures:

(Attach one 4” x 6” picture of your 4-H project animal(s) at the beginning of your project and one 4” x 6” picture of your animal(s) at the end of your project. This will show the growth and development during the project year.)
Project Animal(s)

Breed ___________________________ Date Record Started ___________ Date Record Ended ___________

Record information on all the market lambs you ear tagged and registered for the project. Maximum of four (4) lambs.

<table>

</tbody>
</table>

Totals (1) $ __________      (2) $ __________

(a) 4-H ear tag number.
(b) Applies only if you purchased the animal. If you raised the animal, leave blank.
(c) If you purchased the animal, list the price. If you raised the animal, list the value (For example, if you had to buy an animal of similar quality, what would it cost?).
(d) List the value of those animals that you have at the close of record. If the animal died, it should be considered a loss. If the animal was sold, list the selling price.

Weight Record

Date of beginning weight is the date your lambs were weighed at the start of the project. The date of final weight is the date your lambs will be weighed in at the fair - first Saturday of fair-week. Use the "official fair weight" for the lambs you are entering at the fair. Estimate the weight of your additional lambs that remain at home, and enter the weights in the appropriate column. Calculate each individual lamb’s average daily gain once final weights have been determined/estimated.

<table>
<thead>
<tr>
<th>Identification of animal (a)</th>
<th>Beginning weight</th>
<th>Final weight</th>
<th>Total lbs. of gain (b)</th>
<th>Date of beginning weight</th>
<th>Date of final weight</th>
<th>Days on feed (c)</th>

</tr>
</tbody>
</table>

Totals (3) ______ lbs.     (4) ______ days

(a) 4-H ear tag number.
(b) Final weight - beginning weight = total lbs. of gain.
(c) Days on feed = number of days between date of beginning weight and date of final weight, including the day the final weight was determined.
(d) Total lbs. of gain ÷ days on feed = average daily gain.
Project Efficiency Information

Fill in the blanks (the "numbered footnotes" indicate where the necessary information can be found in your report), and do the necessary calculations to determine **average daily gain**, **feed cost/pound of gain** and **pounds of feed fed per pound of gain**:

\[
\frac{\text{Total pounds of gain (3)}}{\text{Total number of days on feed (4)}} = \text{Average daily gain (lbs./day)}
\]

\[
\frac{\text{Total feed cost (6)}}{\text{Total pounds of gain (3)}} = \text{Feed cost per pound of gain ($/lb. gain)}
\]

\[
\frac{\text{Total pounds of feed fed (7)}}{\text{Total pounds of gain (3)}} = \text{Pounds of feed per pound of gain (/lb. gain)}
\]
