Powering Michigan Agriculture with Renewable Energy

Have you considered harnessing the natural energy of the earth, wind, sun, and water to provide more cost-effective energy for your farm?

- Learn more about energy efficiency and renewable energy technology opportunities (wind, solar, biomass, geothermal and anaerobic digestion) available to Michigan farms.
- Leave equipped with the necessary information to identify which of these technologies is most suitable to help meet your energy management goals.
- Learn about the resources and tools needed to implement these technologies on your farm.
