Sasa veitchii
Pseudosasa japonica
Indocalamus tessalatus
Best of the Zoo
Experience the Botanical Side of the Zoo.
Where is the Botanical Garden? All around us! The Botanical Garden & Zoo is filled with an outstanding collection and a unique blend of gardens and landscape.
PLANTS

The plants in the Recommended Lists from the Botanical Garden at the Cincinnati Zoo come from trials and usage in the conditions of Zoo grounds and also from extensive observations of plants in public gardens and private gardens from the local area. We are confident that usage of these plants in ordinary garden situations will result in good success, provided they are properly cared for.

To support the zoo's horticultural mission by donating plants, money, or time, please contact us at horticulture@cincinna...
