Check List # 1F

What should be in a Master Plan?

This fact sheet is designed to be a guide to planning commissions in determining what topics and information to include in a master plan developed under the new P.A. 33 of 2008, as amended, (the Michigan Planning Enabling Act, M.C.L. 125.3801 *et seq.*). The checklist is adapted from materials developed by the Michigan chapter of the American Planning Association.

The Michigan Planning Enabling Act is a new statute that changes how various planning procedures are done and provides new duties and powers to many planning commissions in the state. The entire purpose of this act was to create a single set of procedures to follow regardless of whether planning is being done by a city, village, township, or by a county. After September 1, 2008 (the effective date of the act) only the procedures in the Michigan Planning Enabling Act should be used as the act replaces the following statutes.

Only for matters that took place before September 1, 2008 should these old statutes still be referenced:

1. County Planning Act, being P.A. 282 of 1945, as amended, M.C.L. 125.101 *et seq.*
2. Township Planning Act, being P.A. 168 of 1959, as amended, M.C.L. 125.321 *et seq.*
3. Municipal Planning Act, being P.A. 285 of 1931, as amended, M.C.L. 125.31 *et seq.* (For cities, villages, and some township planning commissions created prior to 1959.)

For any step of this process, the Michigan State University Extension members of the Land Use Area of Expertise team can assist with sample materials; coordinating efforts between the township, county, and the state; and providing guidelines.

The Michigan Planning Enabling Act requires the following to be included in the plan:

“Make careful and comprehensive surveys and studies of present conditions and future growth within the planning jurisdiction with due regard to its relation to neighboring jurisdictions.”
(§31(2)(a))

“Thirty seven million acres is all the Michigan we will ever have.”

The above can be considered the data, or fact book. In addition the plan shall:

“A master plan shall address land use and infrastructure issues and may project 20 years or more into the future. A master plan shall include maps, plats, charts, and descriptive, explanatory, and other related matter and shall show the planning commission’s recommendations for the physical development of the planning jurisdiction.” (§33(1))

“A master plan shall also include those of the following subjects that reasonably can be considered as pertinent to the future development of the planning jurisdiction:” (§33(2))

1. A land use plan. (§33(2)(a))
2. Recommendations on infrastructure. (§33(2)(b))
3. Recommendations for redevelopment or rehabilitation of blighted areas. (§33(2)(c))

Glossary

The following terms are used in this publication, and have the following specific meanings.

§ means the section number of Public Act 33 of 2008, as amended, (being the Michigan Planning Enabling Act, M.C.L. 125.3801 *et seq.*),

Chief administrative official means the manager or other highest nonelected administrative official of a city or village.

Chief elected official means the mayor of a city, president of a village, supervisor of a township, or chair of a county board of commissioners.

Ex officio member means a member of a planning commission, with full voting rights unless otherwise specified by city or village charter, by virtue of holding another office for the term of that office.

Legislative Body means the county board of commissioners of a county, the board of trustees of a township, the council of a city or village, or other similar elected governing body of a county, township, city, or village.

Local Unit of Government means a county or municipality.

Municipality means a city, village or township.

Plan means any plan adopted under the Michigan Planning Enabling Act or one of the three former planning acts, regardless of what it is titled.

Planning Commission means the local unit of government planning commission created under the Michigan Planning Enabling Act or one of the three former planning acts, regardless of what it is titled.

Planning jurisdiction means the area encompassed by one of the following:

- For a city or village, the legal boundaries of a city or village, respectively, and any area outside of the city or village boundary that the planning commission deems related to the planning of the city or village;
- For a township, the legal boundaries of a township outside the limits of a city(ies) and village(s);
- For a township who’s planning commission was formed under P.A. 285 of 1931, as amended, (M.C.L. 125.31 *et seq.*), the legal boundaries of a township outside the limits of a city(ies) and village(s), and any area outside of the township boundary that the planning commission deems related to the planning of the township. (See §31(1)(b))
- For a county, the legal boundaries of a county outside the limits of a city(ies) and village(s); or the county including any city(ies) and village(s) which has adopted the county plan (See §31(1)).

2. A county general plan, if the county has not adopted (and will not be adopting) a zoning ordinance. (§33(2)(a))
3. If there is zoning, then the plan shall include a zoning plan for the various zoning districts and an explanation of how the land use categories (on the future land use map) relate to the zoning district map. (§33(2)(d))

The Planning Enabling Act allows communities great latitude in determining the contents of a master plan. The act refers to all types of plans as “master plan,” but many communities structure and name their plan according to the specific needs of their area. This list, of types of plans, can be presented as the following:¹

1. General plan – These items are most relevant for county planning commissions that do not administer a zoning ordinance.
2. Future land use plan – Should be used by counties and all jurisdictions with zoning ordinances and may be used by counties without a zoning ordinance.
3. Comprehensive plan – Includes options for more detailed analysis and recommendations related to a broad range of social, environmental and economic issues.
4. Growth management plan – Includes elements especially relevant for rapidly growing communities.
5. Common elements for all plans – Lists topics and information that could be included in any community’s plan or any type of plan.
6. Other plans – Lists plans that may exist in your community based on other enabling legislation. These may be referenced in the master plan.

Many communities organize their plans into two major sections – **the plan** that is the meat of the document including the goals, objectives and policies that guide the physical development of the community (§33); and the **background information, data book, or fact book** that provides data and analyses that support the plan (§31). Some communities have a third, optional, section which is an executive summary,

¹A best planning practice, as defined by the Michigan Association of Planning (MAP) Law Committee work on the Coordinated Planning Act (never adopted) and now considered by MAP as best planning practice.

or simply written and heavily illustrated presentation of the plan, a chart, web page, poster, or combination of the above. These two or three sections can be parts of one document or might be two or three separate documents. Communities may also include information and polices by reference to other plans or documents.

Another way to look at the organization of a plan is to look at a table of contents of a sample plan. In Appendix “A” (page 10) of this pamphlet is a sample table of contents. It is very detailed, reflecting a very complete plan. Your community’s plan is likely to have less material in it. This is presented so that you have a complete list of what might be considered.

A note about the Internet: Planning commissions develop extensive printed fact books as a reference and to support master plan policies. With the growth of the Internet, much of this information is now available online and could be included in a plan by reference instead of reproducing in printed form. There are many excellent sources of accurate and relevant information on the web, but there are also other sites that contain inaccurate or out-of-date data. Planning commissions should use professional assistance and great care in identifying reliable Internet-based information sources.² Also, if the plan, or fact book, makes reference to material on the internet, great care should be used to make sure the web master, or web page editor, does not subsequently change the web site so it can no longer be found or otherwise can not be recovered. Also, if the plan, or fact book, makes reference to material on the internet and adopts it as part of the plan by reference or bases long term conclusions on the web site’s content, great care should be used to make sure the web master, or web page editor, does not subsequently change or update the content of the web site. The content and

intent of a plan can easily be challenged when web site data it was relying on is inadvertently changed by someone else and no longer reflects what was adopted.

This checklist is not designed as a substitute for reading and understanding the Michigan Planning Enabling Act or for legal advice and professional planner services.

It is **important** to document each step of the process in planning and zoning a community by keeping detailed minutes, affidavits of publication and mailing, open meeting notices, letters of transmittal, and communications all on file so years from now they are still available.

This checklist is divided into seven columns. The first column lists potential plan content elements. The second column is used to indicate if the content element will be included in the plan. Columns three to seven indicate where in the plan that element should be located.

Minimum Plan Content Required by the Act

According to the Michigan Planning Enabling Act, at a minimum, the following elements are to be a part of a plan.

1. Minimum Statutory Plan Content	2. Do we want to include this element in the plan?	Where should this element be located in the plan?				
		3. The plan	4. The background information or fact book	5. An optional summary document (poster, flyers, executive summary)	6. Reference to other plans	7. Reference to other sources such as the Internet

This is the first of three ways to evaluate the content of your plan. The table above should be considered the legal minimum. Most plans should contain much more.

Best Planning Practice Plan Content

The following checklist is adapted from materials developed by the Michigan chapter of the American

Planning Association, from their work toward a Coordinated Planning Act (never adopted). It provides a rather complete list of the analysis that should be a part of a plan and fact, or data, book.

Following this table, in Appendix A (page 10) , is a sample table of contents for a plan, data or fact book, and summary. It gives just one example of how information in a plan might be organized.

1. Plan Content	2. Do we want to include this element in the plan?	Where should this element be located in the plan?				
		3. The plan	4. The background information or fact book	5. An optional summary document (poster, flyers, executive summary)	6. Reference to other plans	7. Reference to other sources such as the Internet
<p>General Plan</p> <p>Is a policy-based plan with generalized future land use maps.</p> <p>Include a section on affordable housing needs and a strategy to meet those needs.</p> <p>Includes a section on job development and a strategy to meet those needs.</p> <p>Address the relationship between jobs, housing, and transportation within the local unit of government or region.</p> <p>Include a separate section on multimodal transportation including streets and highways, public transit, airports, railroads, ports, and pedestrian and bicycle ways.</p> <p>A section on capital facilities owned or operated, or both, or privately contracted by the local unit of government, together with long-range fiscal plans for the provision of new capital facilities for the local unit of government.</p> <p>The plan shall be the basis for the county or regional capital improvement program including capital improvements to be done by a county road commission, drain commissioner, parks and recreation commission, department of public works, or other county board or commission.</p> <p>Provide an analysis of all the municipal or joint municipal plans of municipalities within the county to ensure coordination and consistency, including, but not limited to, buildout, economic, fiscal, environmental, and social impact analyses.</p> <p>A plan may incorporate by reference plans, or portions of plans, adopted by other agencies of political subdivisions, a regional plan, this state, or the federal government.</p> <p>Include such other elements as determined by the planning commission.</p>						
<p>Future Land Use Plan</p> <p>Each element of the General Plan, above.</p> <p>The arrangement of future land uses, as well as the intensity and density of such uses</p>						

	2. Do we want to include this element in the plan?	Where should this element be located in the plan?				
1. Plan Content		3. The plan	4. The background information or fact book	5. An optional summary document (poster, flyers, executive summary)	6. Reference to other plans	7. Reference to other sources such as the Internet
<p>An explanation of the future land uses' degree to which they are or are not compatible with the future land use plans and zoning regulations of adjoining jurisdictions, municipalities within the county, or the management plans of state or federal agencies with public lands within the county</p> <p>Future land use shall be described in the text and depicted on a future land use map showing the general location and arrangement of future land uses, but not parcel lines.</p> <p>A future transportation network, including, but not limited to, roads and streets, bridges, railroads, airports, bicycle paths, and pedestrian ways.</p> <p>Provision for a network of electronic communication facilities.</p> <p>Future capital facilities.</p> <p>A zoning plan for the control of the height, area, bulk, density, location, and use of buildings and premises, for current and future zoning districts.</p> <p>An explanation of the zoning plan's relationship to the future land use plan.</p> <p>A description of how the community intends to move from present conditions illustrated on the current zoning map and described in the zoning plan to the proposed future relationship of land uses illustrated on the future land use map.</p> <p>A discussion of measures considered and included in the development of the future land use plan to avoid possible takings of private property without just compensation if land use regulations were to be subsequently adopted or amended consistent with the plan.</p> <p>Each of the elements of a future land use plan, above, should incorporate goals, objectives, policies, and strategies to be employed in fulfilling the plan</p> <p>Each element of a future land use plan should utilize maps and, if helpful, plats, charts, and tables. Maps, plats, charts, and tables should be accompanied by descriptive explanatory text.</p>

<p>Maps and text with an analysis of existing conditions and strategies to address identified problems and/or opportunities for Natural resources management, including, but not limited to, agricultural and forest lands, mineral lands, wetlands, floodplains, headwaters areas, sand dunes, areas at high risk of erosion, other sensitive areas, endangered or threatened species habitat, and land use related to preserving biodiversity.</p> <p>Maps and text with an analysis of existing conditions and strategies to address identified problems and/or opportunities for Measures to define, protect, enhance, or change community character.</p>						
<p>Growth Management Plan Each element of the General Plan, land use plan, and comprehensive plan, above. The boundaries for expansion of capital facilities and/or public services of local units of government during the period of the plan. Maximum density of land use based on available public services and facilities and specified level of service standards for those services and facilities. The plan should be consistent with P.A. 110 of 2006, as amended, (Michigan Zoning Enabling Act, M.C.L. 125.3101 <i>et seq.</i>) pursuant to P.A. 12 of 2007 for a purchase of development rights program, and/or to the extent permissible by law, transfer of development rights program. Maps showing the location of proposed future road right-of-way and of other public facilities beyond 5 years in the future. A strategy and locations to target provision of affordable housing. A strategy that links future jobs, housing, and transportation in mutually supportive ways. A strategy for land assembly and redevelopment. Other elements as necessary to implement the growth management or redevelopment goals of the plan.</p>
