## Blueberries

*Michigan-grown blueberries are available in July and August.*

Fruits and vegetables provide nutrients that will give you energy and help you feel satisfied longer. Preserving them for later use is easy and can save you money over time.

Michigan State University Extension provides education that helps people buy and prepare healthy, budget-friendly foods as well as live a balanced, healthy lifestyle.

Blueberries have many health benefits. With only 100 calories in a one-cup serving, these flavorful berries provide a fat-free, sodium-free, cholesterol-free and high-dietary-fiber addition to your diet. They are also packed with disease-fighting antioxidants and are a good source of vitamin C.

Choose dusty-blue, firm, plump, dry berries. You can safely refrigerate blueberries for 10 to 14 days. Add them to your meals in a variety of ways – top off cereal or pancakes, add them to muffins or waffles, or just enjoy them one at a time.
